Forks Over Knives continues its strong presence at the top of several retail charts. The DVD is currently the #1 documentary sold on Amazon and is consistently in the top 50 of all DVDs sold.

The companion book, meanwhile, is a New York Times Best Seller for the 28th consecutive week, landing at #6 in the category of Advice, How-To and Miscellaneous. The latest ranking will be published in the newspaper on February 5.

We are thankful for everyone supporting the film and book, and excited that word about the potential of healthy plant-based living is reaching so many people.
